*Current as of date stated above. Ratings are issued and reported at the Portfolio level. A fund rated 'AAAm' demonstrates extremely strong capacity to maintain principal stability and to limit exposure to principal losses due to credit risk. 'AAAm' is the highest principal stability fund rating assigned by S&P Global Ratings. S&P's ratings represent an opinion only, are not recommendations to buy, sell or hold securities of a Fund, and may be revised or withdrawn at any time. The Fitch AAAmmf, money market fund rating reflects the Portfolio's extremely strong capacities to achieve the investment objectives of preserving principal and providing shareholder liquidity through limiting credit, market and liquidity risk. The Moody's Aaa-mf rating of the Portfolio reflects the strong underlying credit and liquidity profiles of the Portfolio and the conservative investment strategies employed in the pursuit to generate income while preserving capital and maintaining liquidity for the shareholders.

**The current SEC 7-day yield represents net interest income generated by the investments for the past 7 days and assumes that the same income is generated each week over a 365-day period. The 7-day yield more closely reflects current fund earnings than does total returns. The 30-day yield is the average annualized net investment income per share and is subject to change. Yields for other share classes may vary due to differences in sales charge structure and class expenses. The Fund's yields reflect fee waivers, absent these reimbursements and/or waivers, performance would have been lower. Without these fee waivers and/or reimbursements, the Fund's most recent 7-day and 30-day yields would have been 5.01% and 5.17% respectively.

[†]The fund invests in securities through an underlying fund (hub). Assets are reported at the Portfolio level.

[‡]The fund may close early in certain circumstances, as described in the fund's current Offering Circular. On days when the fund closes early, the final NAV of the day will be calculated as of the early close.

Weighted Average Maturity (WAM) is a weighted average of all the maturities of the securities held in a fund. WAM for money market funds can be used as a measure of sensitivity to interest rate changes. Generally, the longer the maturity, the greater the sensitivity. **Weighted Average Life (WAL)** is the weighted average of the life of the securities held in a fund or portfolio and can be used as a measure of sensitivity to changes in liquidity and/or credit risk. Generally, the higher the value, the greater the sensitivity. However, unlike WAM, WAL does not include interest rate resets in its calculation. **Maturity Distribution** is a measure of a bond's maturity which takes into consideration the possibility that the issuer may call the bond before its maturity date.

Shares of the fund may not be offered or sold, directly or indirectly, in the United States or to any U.S. person. The fund has not been registered for public sale in any jurisdiction, and shares of the fund may not be sold in any jurisdiction where it would be unlawful to offer, solicit an offer for, or sell shares. Residents in the domicile of the fund family may not be eligible to purchase shares of the fund. This document is neither intended to be, nor constitutes, a public offering to sell any fund.
